

Data Base EST-Decor

MATERIAL CLASS	EST-Decor is a type of mass-colored texture for natural finishes based on pigments, aggregates and binders, especially used for ESTone.tex Theming System.
PROPERTIES	Enhances the texture and colors of the reproductions, facilitating the final result of the finish you want to make.
FIELDS OF USE	Ideal for getting aged effects of real contrasts over the ESTone.tex mortars, in reproductions of stones and rocks that carry the weather patina, wear effects or simply to enhance the naturalness of the finish.
COMPOSITION	Inorganic pigments, aggregates, hydraulic lime, cement, acrylic powder binders, perlite and dispersants.
COLORS	8 Colors: White, Ash, Grafito, Ocher, Clay, Terracotta, Leather and Moss.
APPLICATION	For better surface penetration, it should be applied when the mortar to thematize it is still wet without being cured. It can be applied by hand sprinkling it or with brushes of different sizes. After application it can be scrubbed and blurred, depending on the finish and effects that you want to achieve.
APPEARANCE	Colored sandy powder
PACKING	Plastic boats of 1kg, 3kg, 10kg and 20kg.
CONSERVATION	12 months in the original closed container, places covered and without moisture
SECURITY	Wear rubber gloves and goggles. Ensure good ventilation.
